

HEXONET is a leading developer and service provider of reseller technologies for the domain industry. Thousands of customers around the world, from startups to large corporations, trust **HEXONET** as their domain platform provider. Today, **HEXONET** is a fast paced and highly innovative technology company that manages over three and a half million domains for its clients and we are looking to continue the growth and success by adding more members to our team! **HEXONET** is part of the London-based CentralNic Group PLC which is listed on Alternative Investment (AIM: CNIC). CentralNic develops and manages software platforms with customers in over 200 countries and earns revenues from the worldwide sales of domain names.

HEXONET is hiring a Software Engineer to work in --our Dropcatching Department. Dropcatching is the process of registering expired domain names by means of automated systems within a fraction of a second after being released by the registry.

RESPONSIBILITIES:

- Develop and maintain dropcatching engines and backend jobs using the existing technical infrastructure, practices and methodologies
- Work independently to complete development tasks
- Monitor performance of dropcatching engines to provide continuous improvement
- Ensure performance by optimizing code, reducing response time and automating routine tasks
- Deploy new dropcatching nodes around the world
- Maintain internal documentation as reference for the support and implementation team

SKILLS & QUALIFICATIONS:

- You have a degree in computer science or equivalent program with programming experience
- You are interested in project work and processes in software development
- You have good communicative and analytical skills
- Your English is fluent (spoken and written)
- Experience developing and scripting in Linux based environments
- Experience with Object Oriented Programming
- Experience using Git or any other version control systems
- Ideal but not a must, first experiences with Domains and DNS*++***

WHY HEXONET?

- Working within a motivated highly qualified team of experts
- Technically demanding projects, varied activities with a high degree of personal responsibility
- A pleasant working environment, flat hierarchies and a friendly atmosphere
- Flexible working hours
- Very good development opportunities, modern work equipment
- Additional benefits: free drinks and snacks, company pension plan, company parties and afterwork offers

If you are interested in working with an international team, combined with secure and permanent employment, we look forward to receiving your application (in .PDF format): jobs@hexonet.net.
