

HEXONET manages more than 3 million domain names and serves as the backbone for some of the largest Domain Name Registrars worldwide from its headquarter in Homburg, Germany and its headquarter in Vancouver, Canada. HEXONET is part of the London-based CentralNic Group PLC which listed on Alternative Investment (AIM: CNIC). CentralNic develops and manages software platforms with customers in over 200 countries and earns revenues from the worldwide sales of domain names.

*We are looking for a **Software Developer** (m/f)*

Responsibilities:

- Engineer, enhance, and maintain HEXONET's technical infrastructure systems based on Linux, OOP and SQL
- Autonomous and purposeful planning, development and implementation of projects
- Implementation of registration interfaces and various protocols
- Complex problem solving to realize individual customer projects

Skills / Qualifications:

- You are interested in project work and processes in software development
- You have good communicative and analytical skills
- You are enthusiastic about exchanging ideas with colleagues
- Ideal but not a must: first experiences in DNS and MySQL

WHY HEXONET?

- Working within a motivated highly qualified team of experts
- Technically demanding projects, varied activities with a high degree of personal responsibility
- A pleasant working environment, flat hierarchies and a friendly atmosphere
- Flexible working hours
- Very good development opportunities, modern work equipment
- Additional benefits: free drinks and snacks, company pension plan, company parties and afterwork offers

If you are interested in working with an international team, combined with secure and permanent employment, we look forward to receiving your application (in .PDF format): jobs@hexonet.net
